1. Introduction

The TaxiMobility passenger app is a demo app for taxi companies to examine the application features and techniques. The app should not be installed to book a taxi. We are an app development company and not a cab office. Please log on to <http://www.taximobility.com/> to know more about the application.

The Passenger app is a front-end app that provides users with a simple booking experience and allows to book taxis on the go. The app supports convenience, ease of use, and vital functionalities. On the home screen of the app, the passengers can also view the live movement of cabs.

2. Signing Up

To start using the application, passengers are required to download the app from the Google Play Store or iOS App Store and sign up or register using their mobile number or Facebook account.

Continue With mobile number

Continue with Facebook

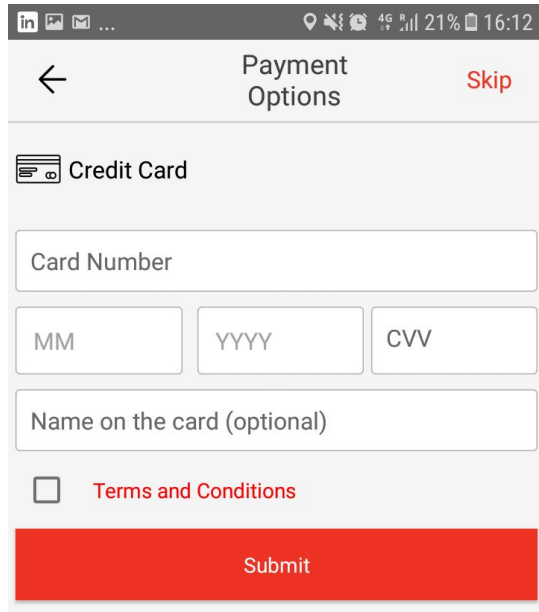

By logging in you agree to our [Terms and Conditions](#) and [Privacy policy](#)

2.1 Mobile Number Registration

To complete the registration process, users are required to enter their mobile number. A verification code will be sent to the entered mobile number. Then, the users have to fill up the sign-up form with required personal details. They can use a referral code if they received from their friends to free coupons. If they enter an invalid referral code, they will be prompted to enter a valid code. If the mobile number and email address entered is already registered with the application, the passengers are asked to enter an alternate mobile number or email or simply sign in using their registered credentials.

Payment Options

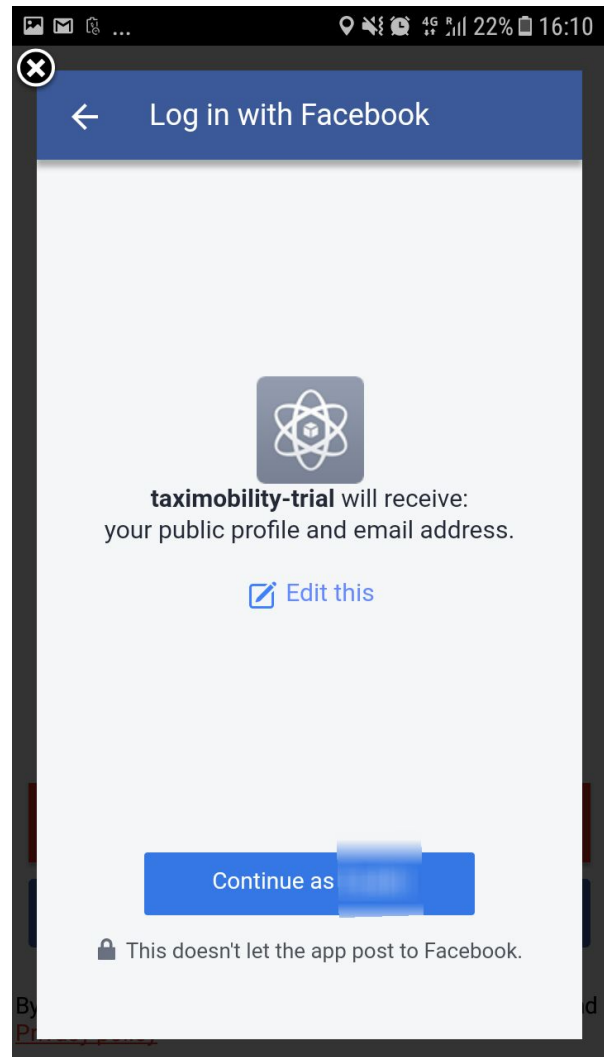

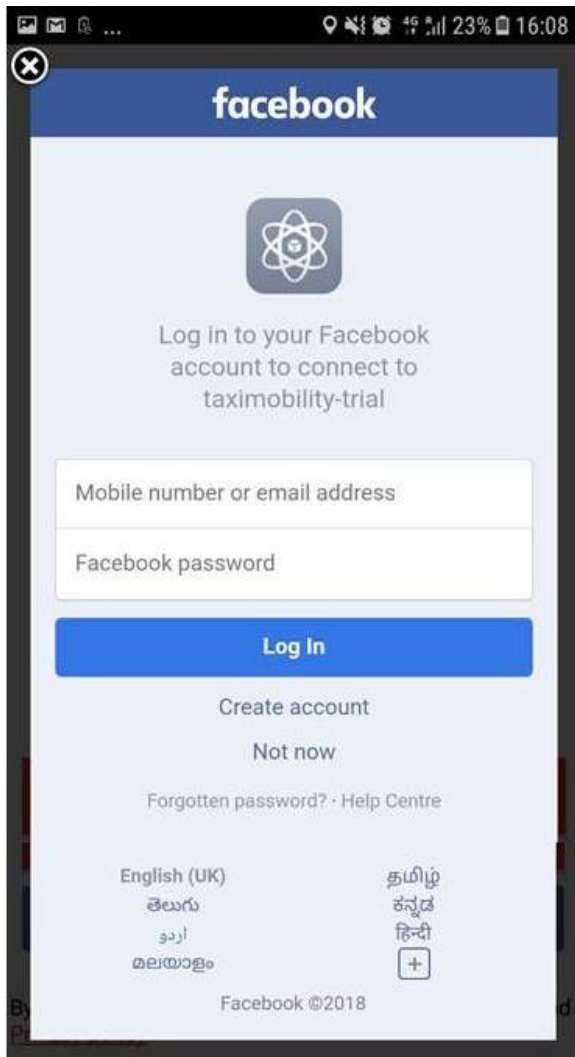

After successful verification of the user account, users will be requested to give their credit card details. They can skip this step by clicking the “Skip” option.

In the form, passengers will be requested to enter the credit card details such as the name, card number, expiry date, and CVV, which can be saved for further transactions. Users can select any one card as default for further transactions. The users can read through the terms and conditions before providing the card details. Selecting the option means users agree to all the terms and conditions mentioned in the same.

2.2 Facebook Registration

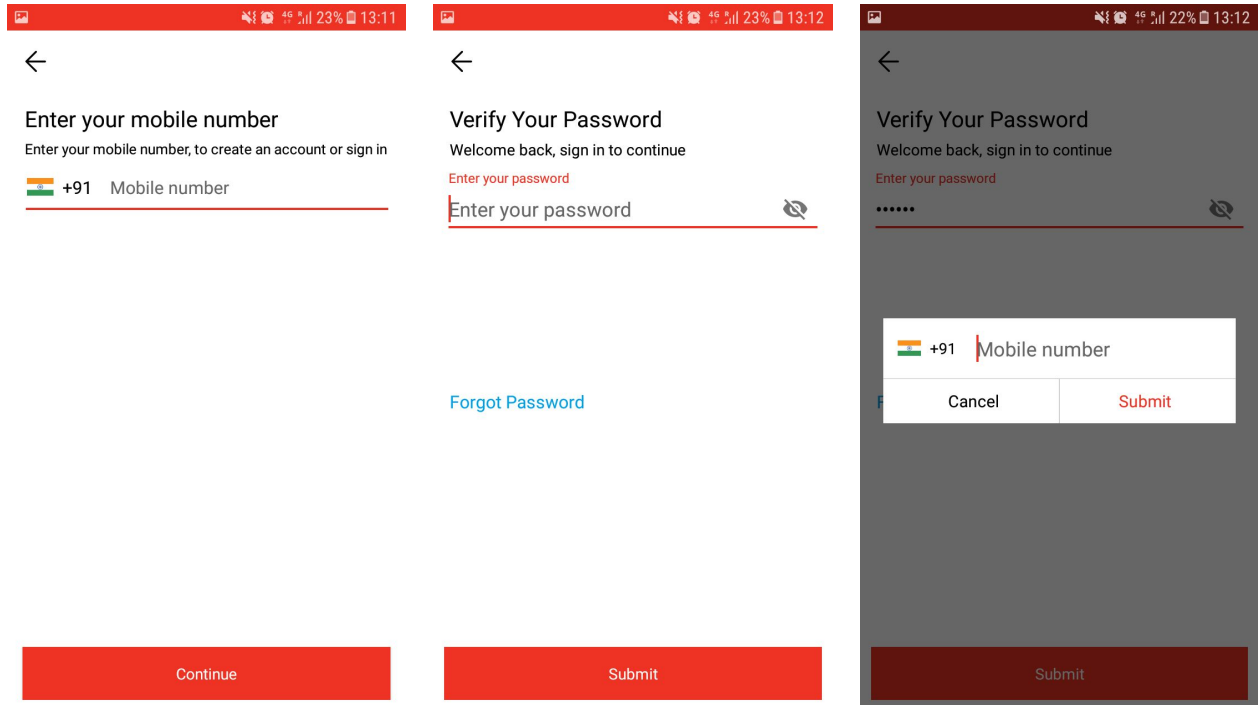

Passengers can also use their Facebook account to sign up. If they don't have Facebook, they can create it by clicking on the "Create Account" option.

3. Signing In

The passengers who have already registered to the application can sign in using their mobile number or Facebook account. By clicking on the “Sign In” button with valid mobile number and password (or Facebook credentials), users can advance to the next stage of the booking process. If they have forgotten the password, they can reset it by pressing the “Forgot Password” option.

TaxiMobility Passenger App – V 9.0

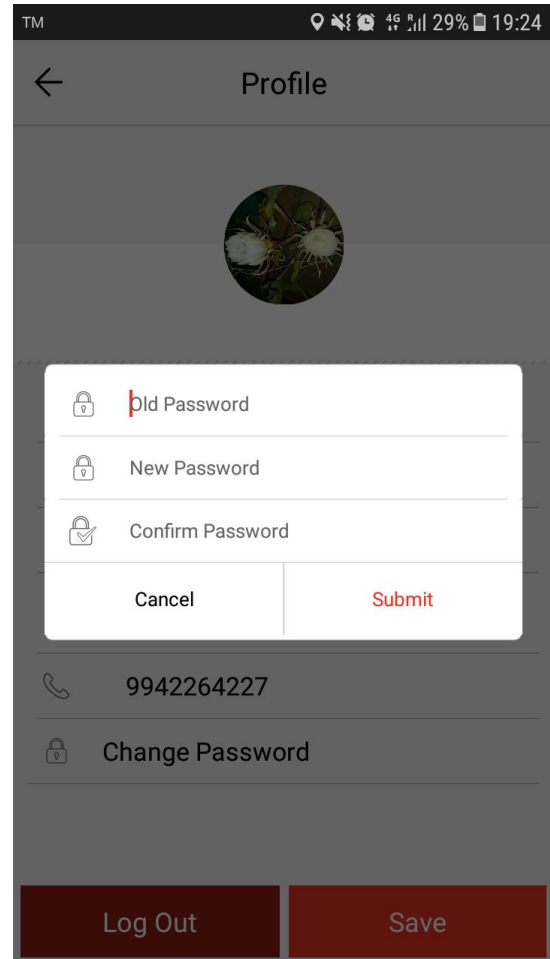

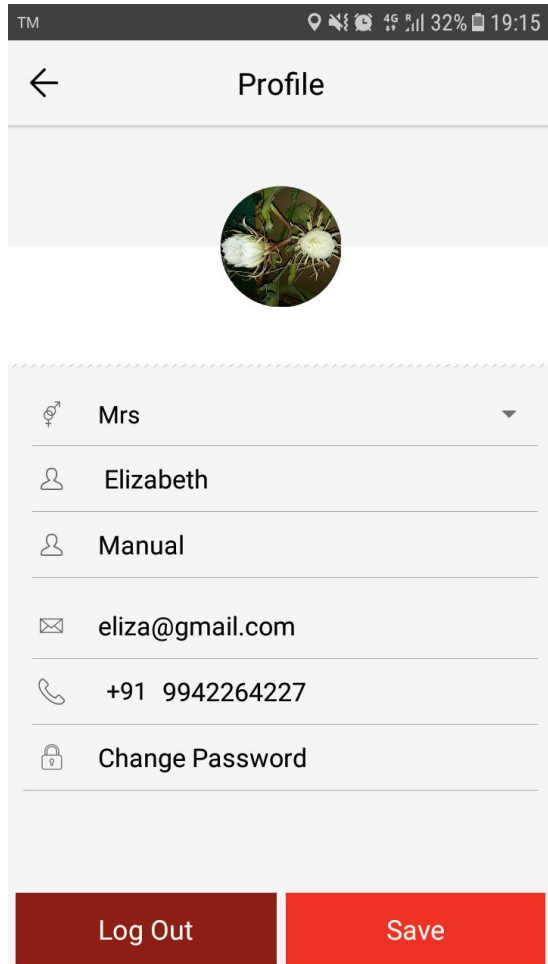

4. Profile

4.1 Edit Profile

By tapping the profile (top-most) section in the above-said menu, passengers can edit their profiles with options to change the profile picture and personal information. The passengers can change their password to new ones if they wish to and click “Save” button to save the details. They can log out of their account by using the “Log Out” button.

TaxiMobility Passenger App – V 9.0

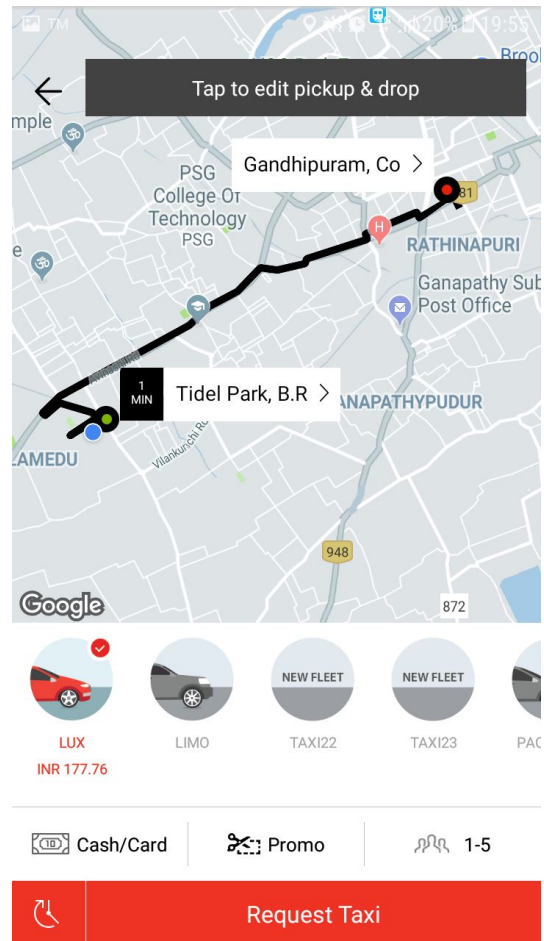

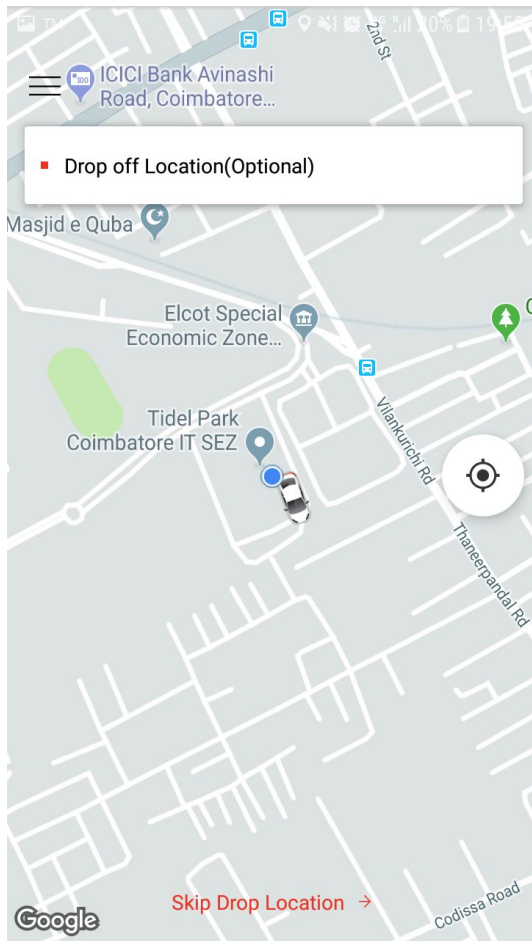

4.2 Booking Request

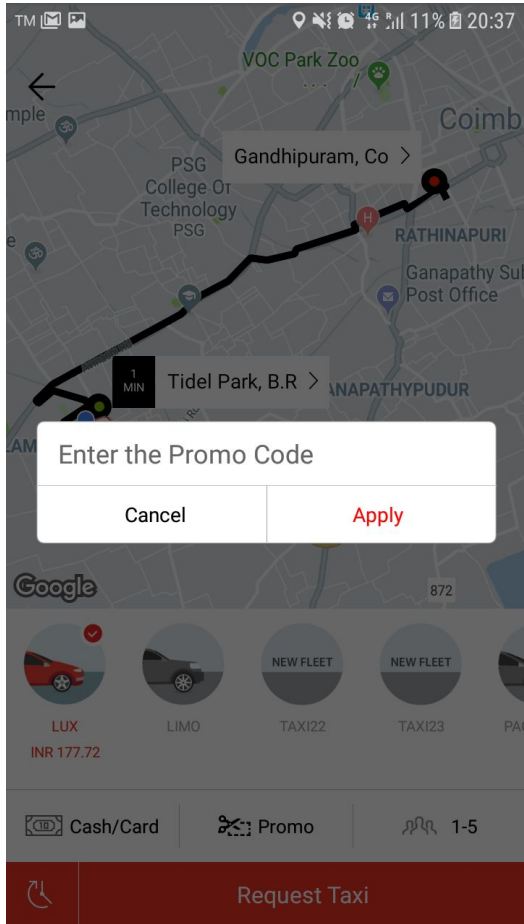

After successfully logging in to the application, the GPS locator will automatically track the current location of the passenger considering it as the pickup point by default. Passengers can also provide a different pickup location by just tapping on the location in the Google Map.

Based on their location, passengers can select from the available vehicle models they prefer to ride in. Pickup and drop-off locations can be changed even after the model is selected. If multi-model dispatch is enabled by Admin in the back end, passengers are availed with other options in vehicle types for the same fare if the requested vehicle is unavailable. Passengers are provided with the fare details for each model to select the one that best suits their budget. After selecting the desired vehicle, click “Request Taxi” button.

TaxiMobility Passenger App – V 9.0

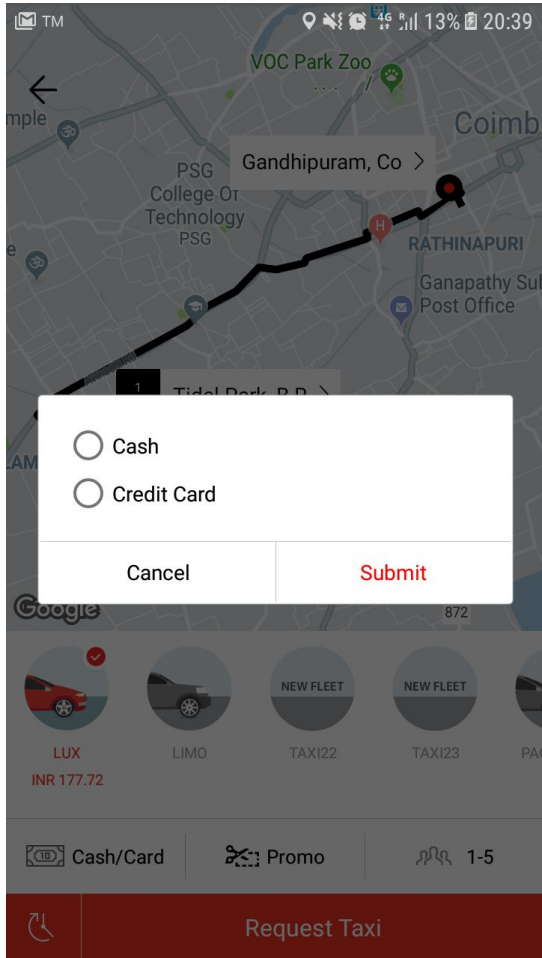

4.3 Applying Promo Code

By applying the promo code shared by the admin, users receive discounts while booking rides. For instance, if they add \$200 to the wallet and the applied promo code offers a discount of 10%, users receive a total of \$220 in the wallet. If the applied promo code is invalid, they will be prompted to enter a valid code.

4.4 Payment Mode

Passengers can also select their preferred mode of payment whether through cash or credit card.

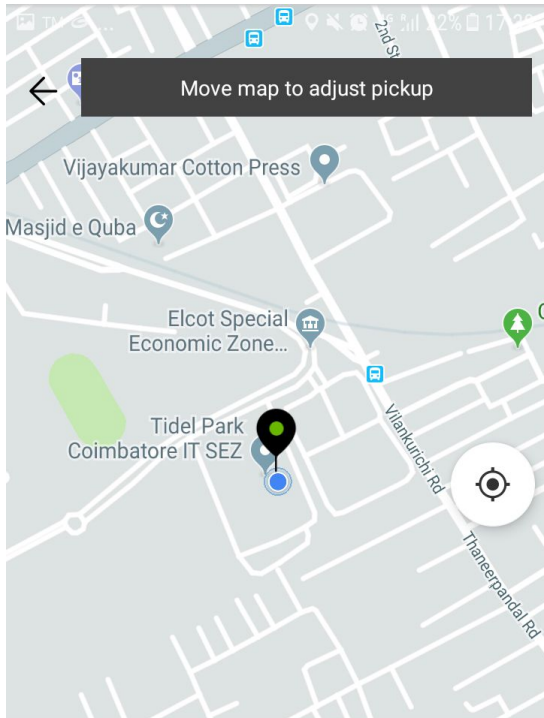

4.5 Package Plans

The passengers can book cabs using the other two ride packages that are Rental and Outstation besides normal booking type:

- **Rental** — With the single booking, the passengers get cabs at their disposal for as long as they want and travel to different destinations. If the time or distance exceeds the package limit, the nominal additional charges will be charged, and the trip can be continued beyond the package limit. It avails the options to book a cab immediately or in advance.
- **Outstation** — The passengers can book cabs for intercity travel. This package allows users to book cabs prior to the travel date or time.

4.6 Booking Confirmation

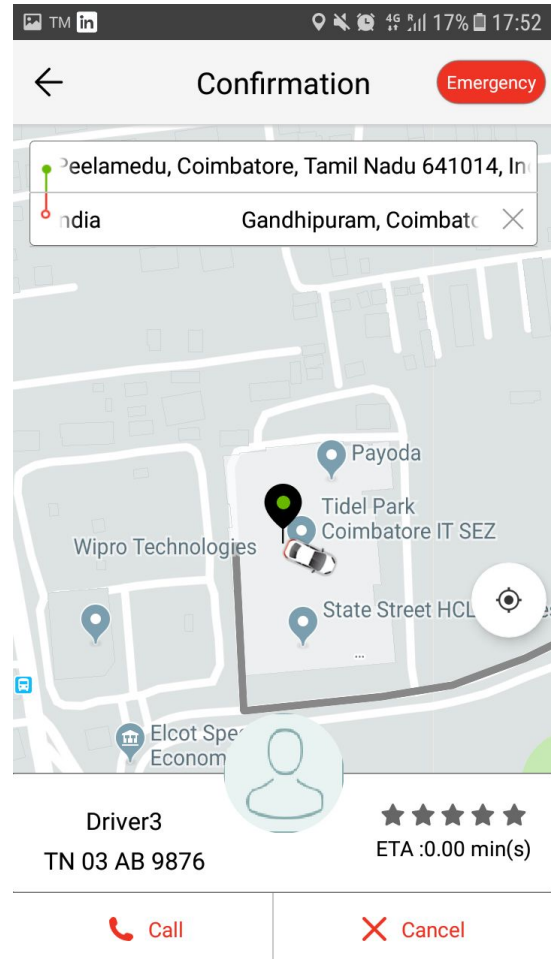

Passengers receive a push notification on the booking confirmation once they click “Request Taxi” and the request is accepted by the specific driver. The passenger can view the details of the driver, such as the overall rating, profile image, name, and taxi number with the estimated time of arrival to the pickup point. Then the driver clicks the Arrived button on reaching the pickup point, and the passenger receives a push notification on driver arrival. On receiving the notification, the passenger can board the taxi without delay. Passengers also have the option to call the driver or cancel the ride providing a valid reason for cancellation.

Confirm your pickup at

Tidel Park, B.R. Puram Industrial Estate,

Confirm Pickup

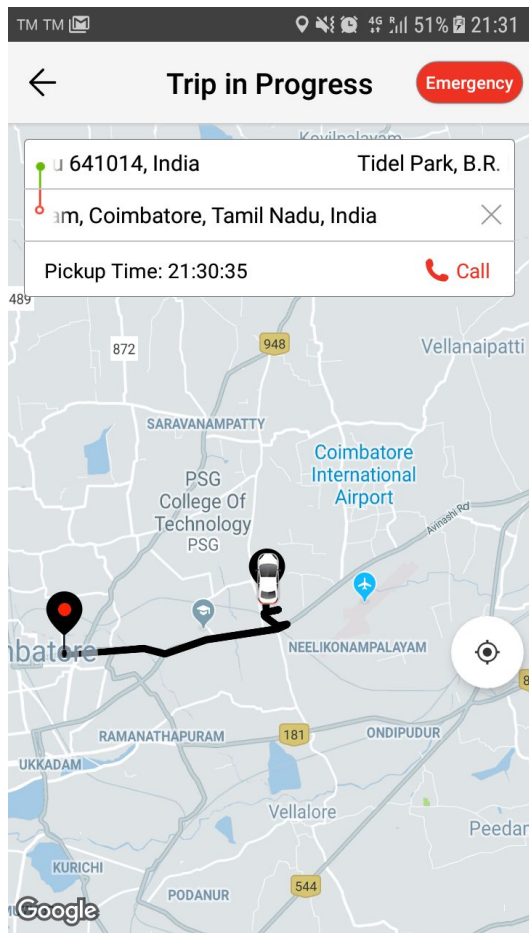

4.7 Emergency Button

Passengers can access the emergency button from the beginning of the trip till the end of the trip. The passenger can click on the “Emergency” button if they encounter an emergency situation during their trip. When they press the button, their emergency contacts that had been saved will be notified through text message about the passenger’s situation and location.

TaxiMobility Passenger App – V 9.0

4.8 Trip in Progress

The passengers can track the progress of their ride from the pickup location to the destination in the map.

4.9 E-receipts, Rating, and Social Media Sharing

Book a Taxi

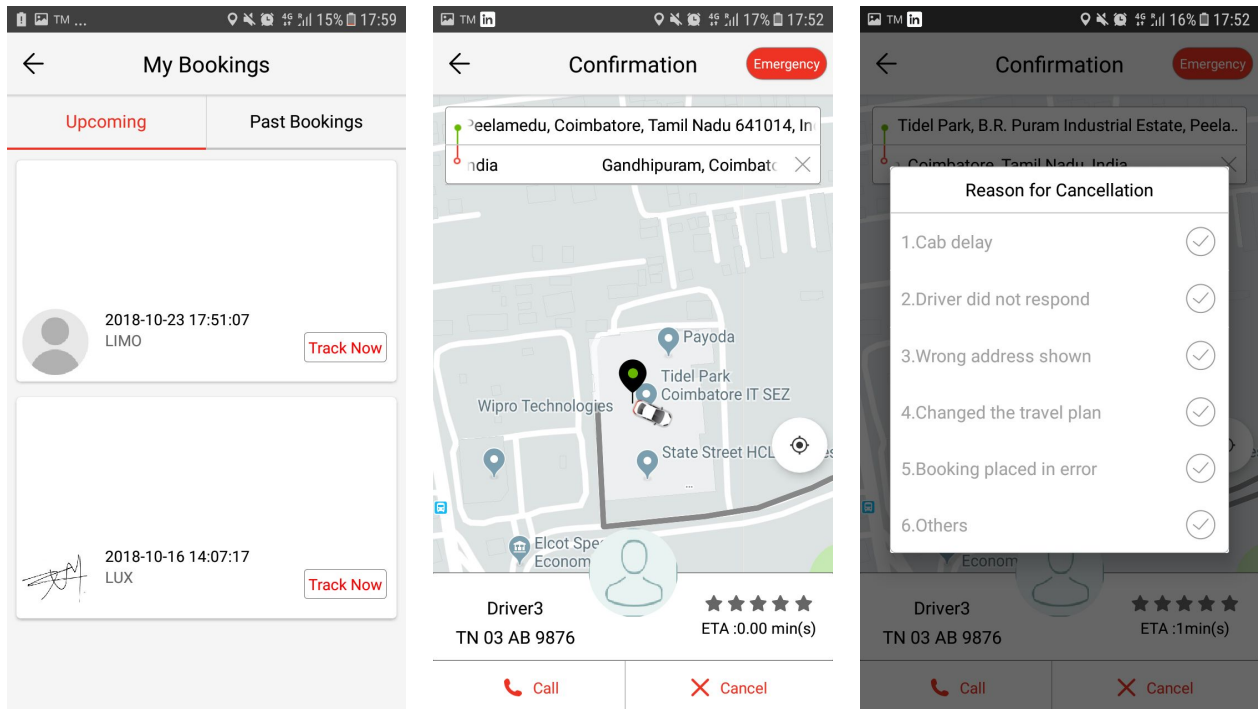

E-receipt including all ride charges is sent to the passenger once the ride is completed successfully and the payment is confirmed. Passengers can also rate the drivers based on the services they provide by clicking the star icons and share their comments and feedback regarding the trip through email, SMS or social networking sites such as Facebook and Twitter. However, these are optional.

5. My Bookings

In addition to the details of the last ride completed, passengers are also furnished with the complete booking history of all the rides they have undertaken till date with the route map for any future reference. “My Bookings” option delivers the following details.

5.1 Upcoming Rides

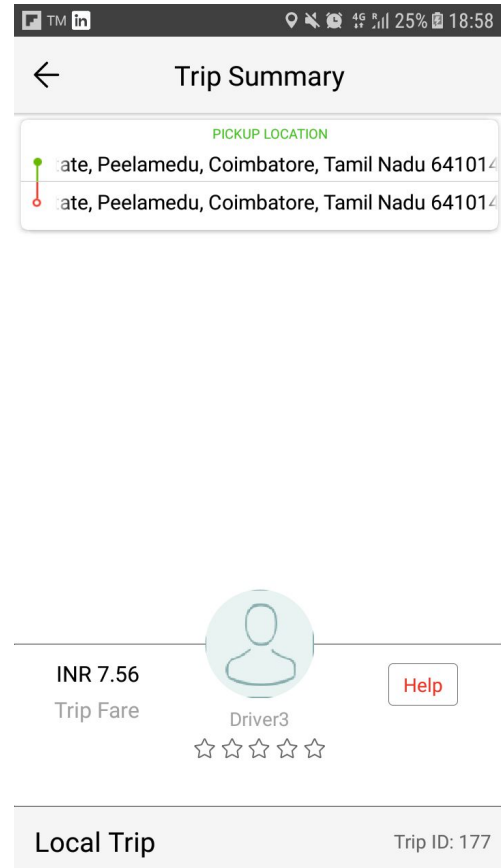

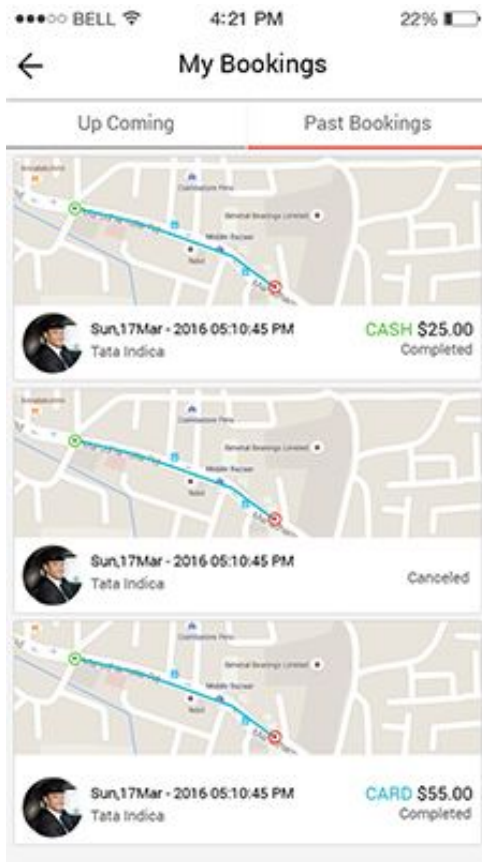

The rides that are reserved for future dates or upcoming rides booked by the passenger or created by the dispatcher and accepted by the driver are listed here. Click on the “Track Now” button to track the driver who had accepted the booking request. Passengers can call the driver by using the “Call” button. If they want to cancel the trip, they can do so by clicking on the “Cancel” button and select the reason for cancellation.

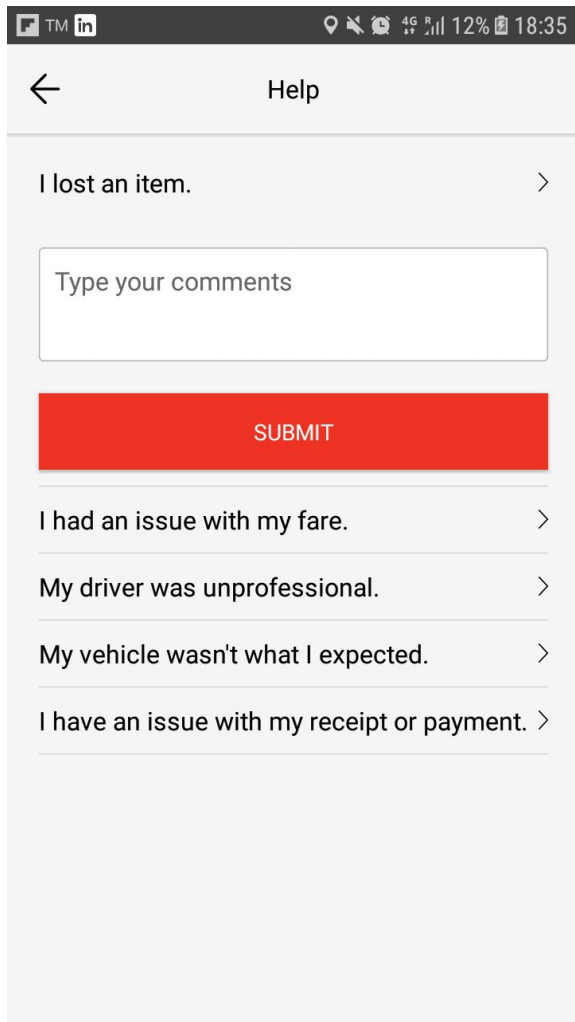

5.2 Past Bookings

All rides that are completed are displayed in this section. The list contains the time, date, pickup and drop-off locations, payment type, and the status of payment for each ride. By tapping on a trip, the passenger can access the trip summary in detail.

TaxiMobility Passenger App – V 9.0

If passengers need any help, they can use the “Help” button and select the option from the listed issues and submit their comment. By swiping the “Local Trip” ribbon, they view the trip summary in detail.

6. Payment Options

Passengers can choose to pay by cash or credit card, or the bonus earned through referral programs (by referring a friend to book a ride using the application). If users opt to pay by credit card, they can use the credit card details already saved or can add a new card by clicking on the “Payment Options” module.

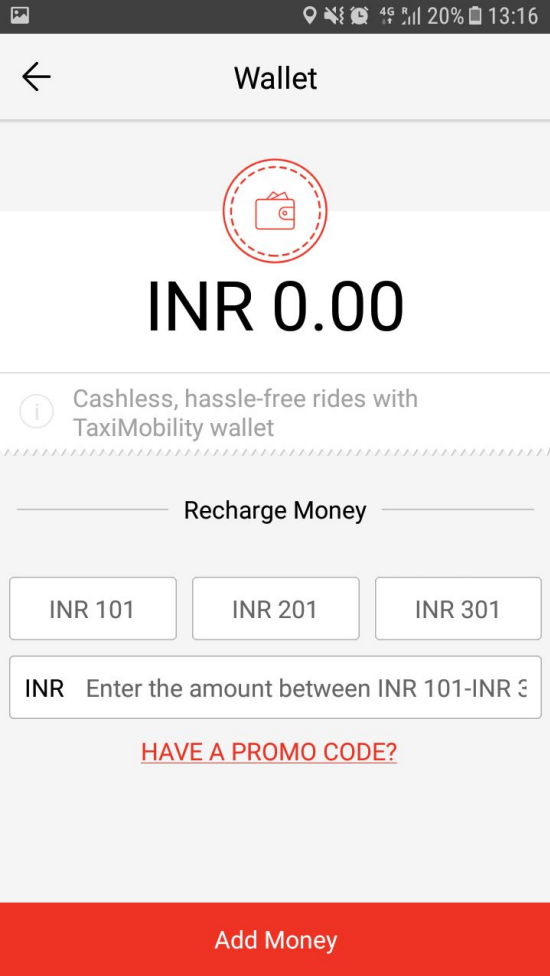

6.1 Add New Card

The Add Card option allows passengers to add details of a new credit card, in addition to the one already saved, by selecting the card type, number, name, and CVV, after which the provided details are validated by the application. The newly added one can be set as default for further transactions instead of the card selected previously.

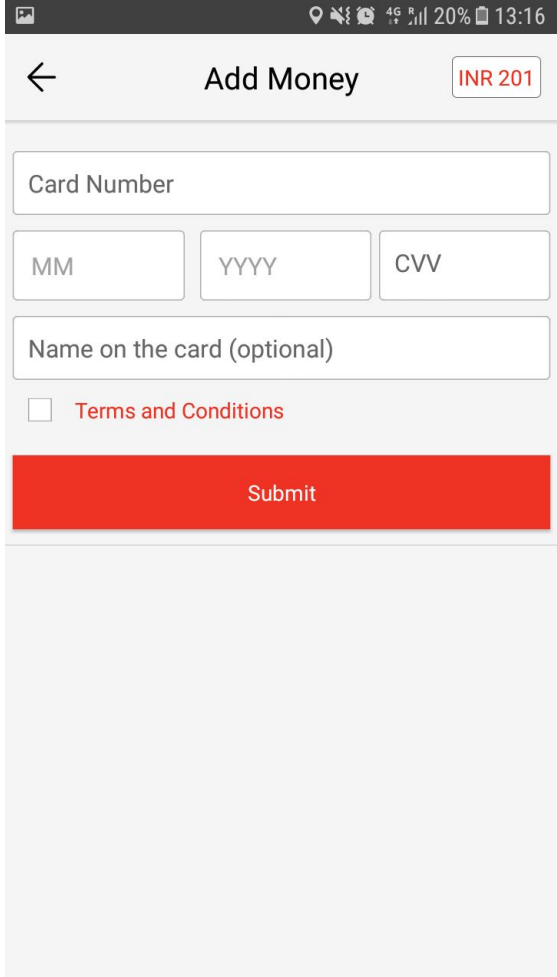

The image displays two screenshots of the TaxiMobility Passenger App interface. The left screenshot shows the 'Payment' screen with a back arrow, a title bar, and an 'Add New Card' button with a right-pointing chevron. The right screenshot shows the 'Add Card' screen with a back arrow, a title bar, and a dropdown menu set to 'Personal Card'. Below the dropdown are input fields for 'Card XXXX XXXX XXXX', 'MM', 'YYYY', 'CVV', and 'Name on the card (optional)'. There is a 'Default Card' toggle switch which is currently turned on (green). Below the toggle is a checkbox and a link labeled 'Terms and Conditions'. At the bottom of the 'Add Card' screen is a red 'Save' button.

7. Wallet

Passengers can make use of online payment to add money to the wallet (within the prescribed range by the admin) for their future rides to make the transactions quick and easy. The wallet displays the available or balance amount after previous transactions and also renders the facility to apply promo code to add the discount amount to the wallet. As and when a passenger makes a payment using the amount in the wallet, the particular amount is deducted from the passenger wallet.

The screenshot shows the 'Wallet' screen of the TaxiMobility app. At the top, there is a back arrow and the title 'Wallet'. Below this is a red circular icon with a wallet symbol. The balance is displayed as 'INR 0.00'. A section titled 'Cashless, hassle-free rides with TaxiMobility wallet' includes an information icon. Below this is a 'Recharge Money' section with three buttons: 'INR 101', 'INR 201', and 'INR 301'. A text input field is labeled 'INR' and contains the placeholder text 'Enter the amount between INR 101-INR 3'. Below the input field is a red link that says 'HAVE A PROMO CODE?'. At the bottom is a large red button labeled 'Add Money'.

The screenshot shows the 'Add Money' screen of the TaxiMobility app. At the top, there is a back arrow, the title 'Add Money', and a red button labeled 'INR 201'. Below this is a form with several input fields: 'Card Number', 'MM' (Month), 'YYYY' (Year), 'CVV', and 'Name on the card (optional)'. There is a checkbox labeled 'Terms and Conditions'. Below the form is a large red button labeled 'Submit'.

8. Favorite

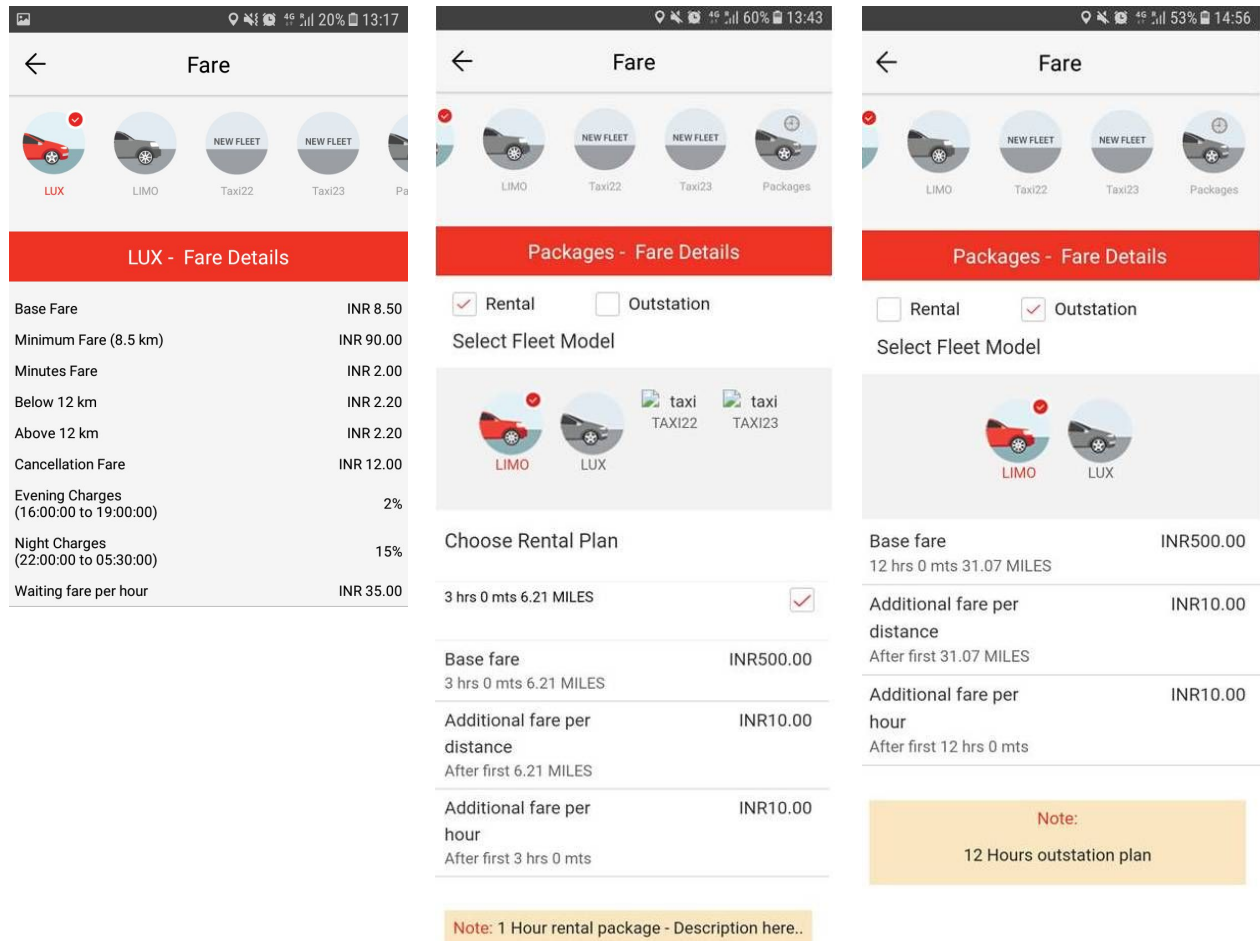

Passengers are provided with the facility to save the details of locations they frequently travel to in the Favorites list along with the route map. The next time they hire taxis for the same location, they need not enter the pickup and drop locations but just select from the previously saved details and click “Book Now” option. They can also modify their Favorites list as desired.

9. Fare

By clicking on the “Fare” module, the user can view the fare details of the different vehicle models and package plans.

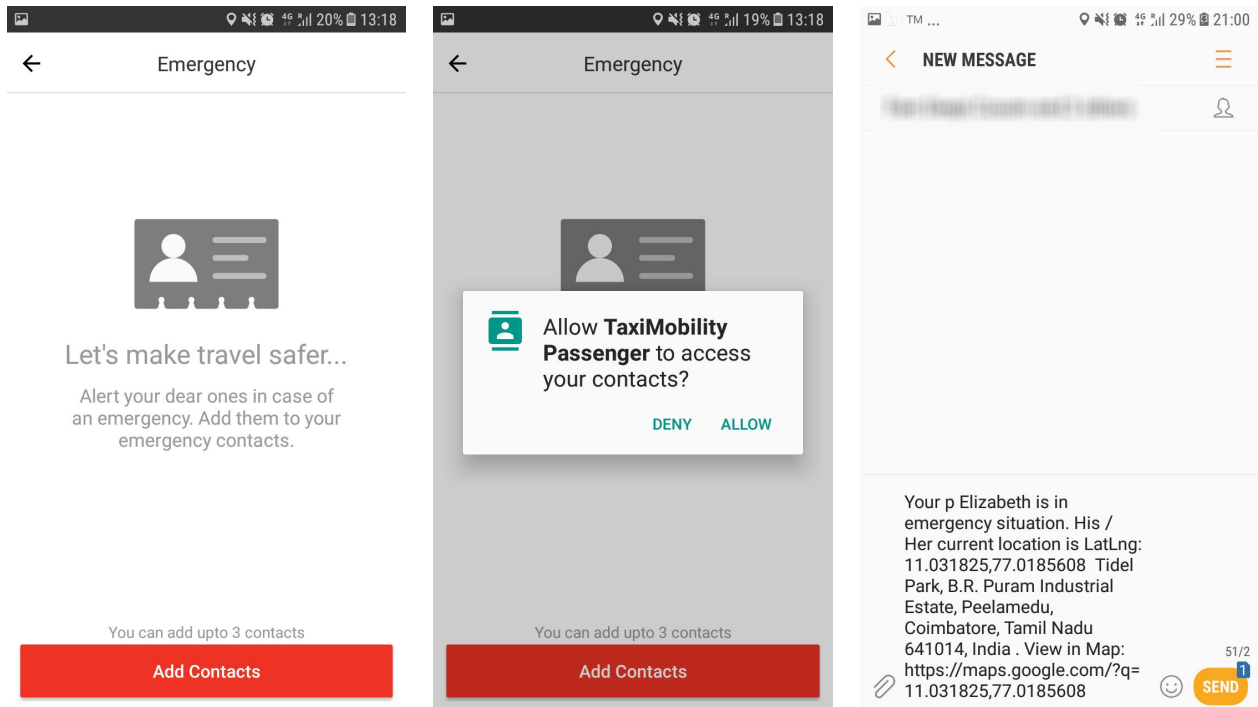

TaxiMobility Passenger App – V 9.0

10. Emergency Contacts

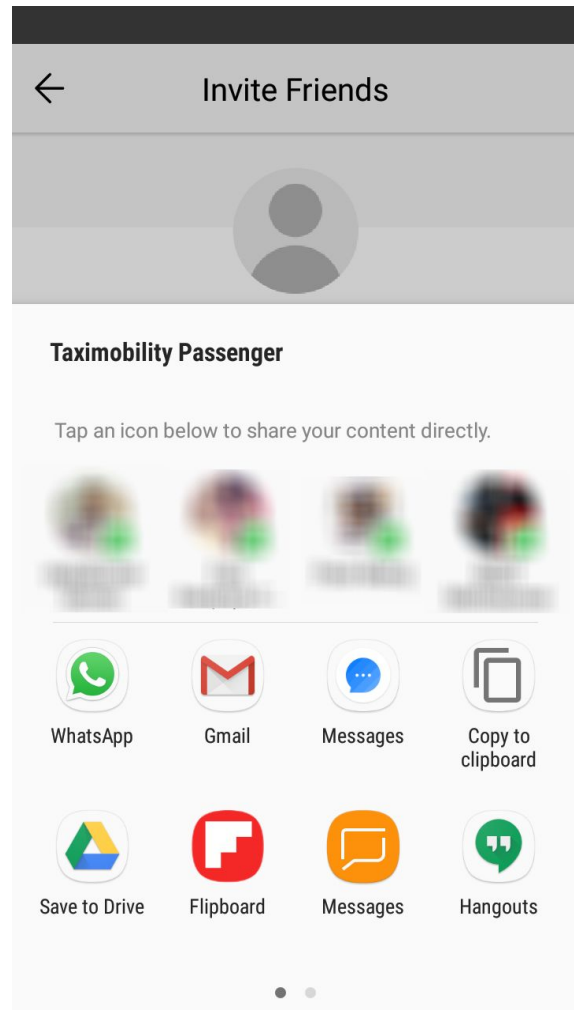

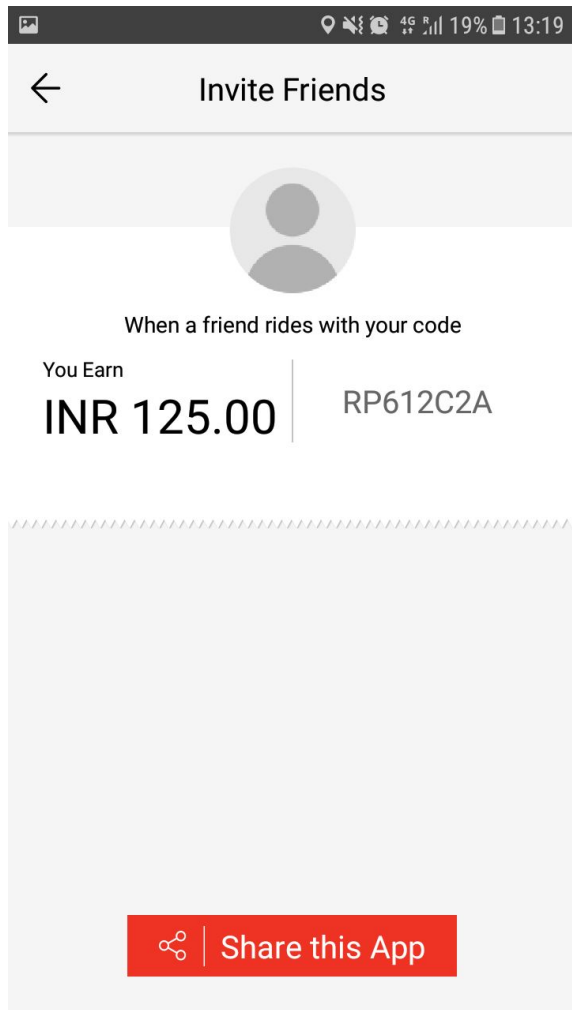

Passengers need to add three contact details to be notified during emergency situations. If they press the emergency button when they are on trip, their location, and other details will be sent to the saved contacts as a text message to track them instantly.

TaxiMobility Passenger App – V 9.0

11. Invite Friends

Passengers can invite friends to share their referral code to a friend via email, SMS or any social media including Facebook, Twitter, and Whatsapp. The respective amount will be credited to the friends' wallet, which can be used for payment for the rides they undertake. (For instance, if the referral amount is \$20, when passenger 1 shares the referral code to passenger 2, the wallet of passenger 2 will be credited with \$20. When passenger 2 completes the ride using the provided referral code, \$20 will be credited to the wallet of passenger 1.) Thus, users at both ends gain benefits.

12. Settings

Language - It enables users to select from a list of languages displayed in the application including English, Russian, Turkish, German, Portuguese, and Arabic to get the text displayed in the preferred language. Customized language from the back end will be updated to mobile apps, once the app is closed and reopened. Users can also enable the split fare, favorite place, and favorite drivers features, if preferred.

Split fare – To share ride fare with their friends in the contact list.

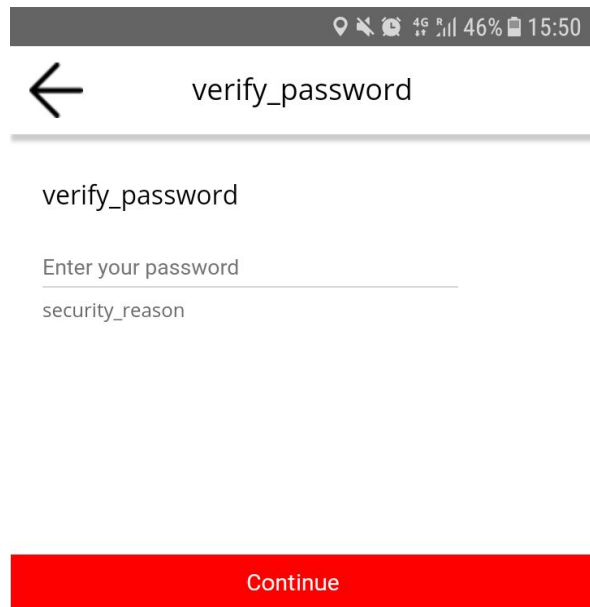

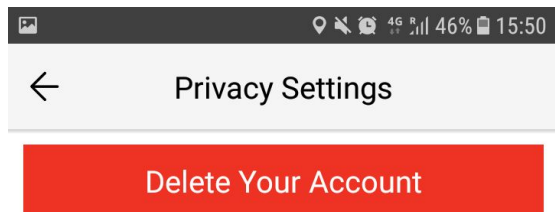

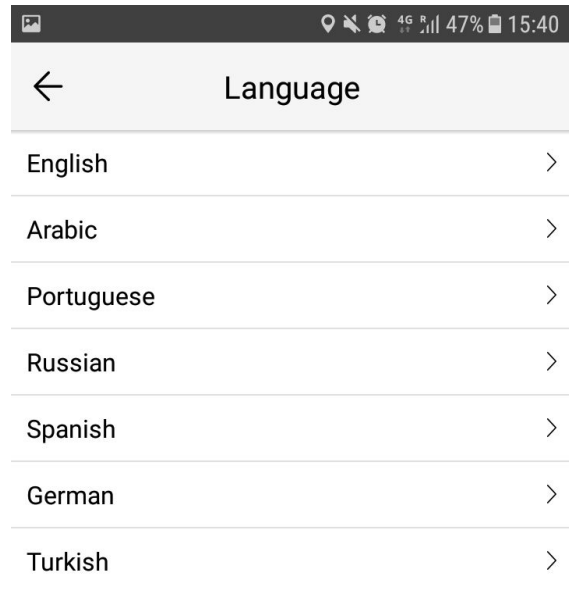

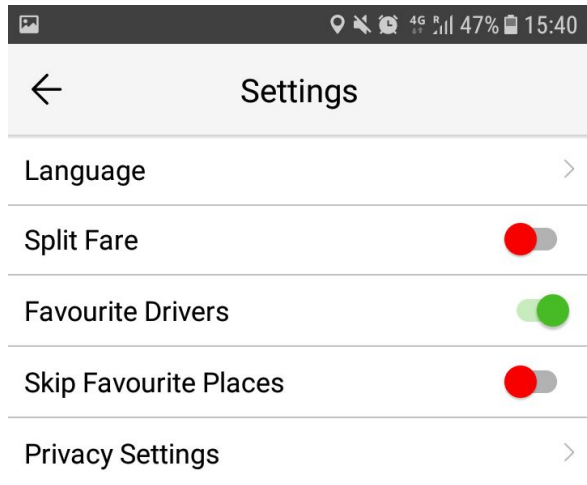

Favorite place – To show the nearest 3 favorite places (from those places already set as favorites) in the booking page.

Favorite Drivers – To select the favorite driver (from those drivers already set as favorites) for each ride.

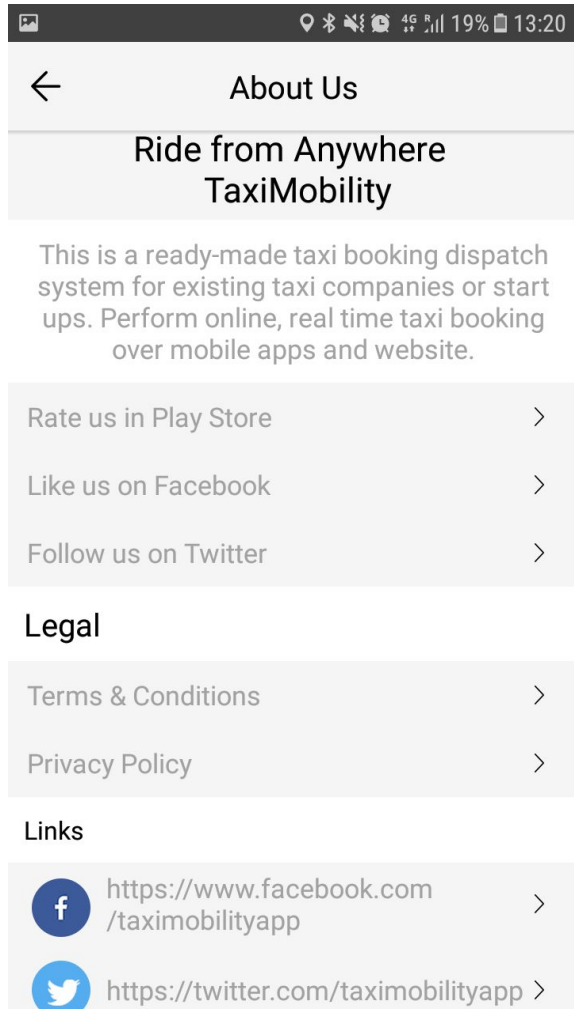

Privacy Settings – The passengers can dissolve their account by using the “Privacy Settings” menu. Once

TaxiMobility Passenger App – V 9.0

he/she clicks on the “Delete Account” button, they will be asked to enter their password to proceed further.

13. About Us

The About Us page provides an overview of the application, and it also extends to passengers links to the application through social networking sites such as Facebook and Twitter allowing them to post comments and share feedback on the rides they undertake. It further provides a brief account of the terms and conditions, and the privacy policy.
