1. Introduction

The TaxiMobility mobile application for drivers with GPS integration and driver-focused properties helps empower taxi drivers with more jobs and back-to-back rides. The drivers get to customize their status based on the availability and shift timings, which in turn enables passengers to pick drivers at the nearest location. The drivers can track the route they travel via Google Map integration in the app and make route choices to reach the destination more conveniently. Drivers also receive an elaborate record of all rides they undertake for any future reference.

2. Signing Up

2.1 Mobile App Registration

To start using the application, drivers are required to download the app from the Google Play Store or iOS App Store. By clicking on the “Sign up” option, drivers can register themselves. To become a driver, drivers have to enter all the required details in the form and submit it. If they satisfy the criteria set by the admin, their account will be activated after the validation of documents and background checks.

2.2 Driver Registration in Web

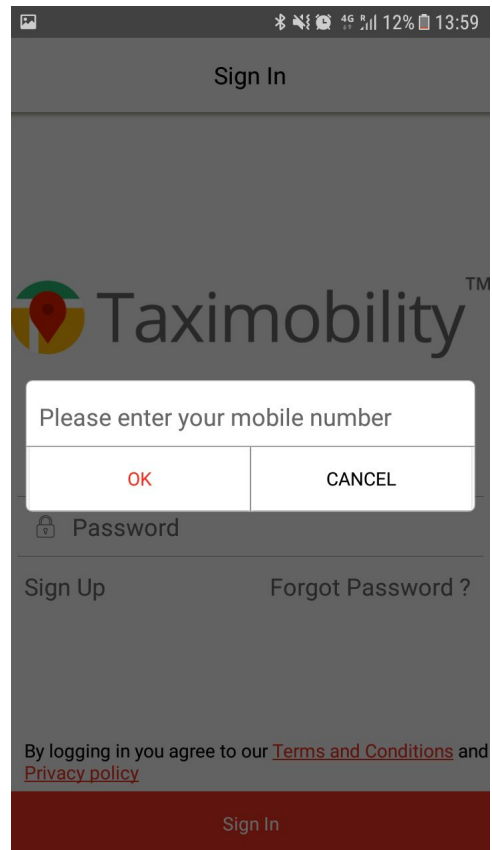

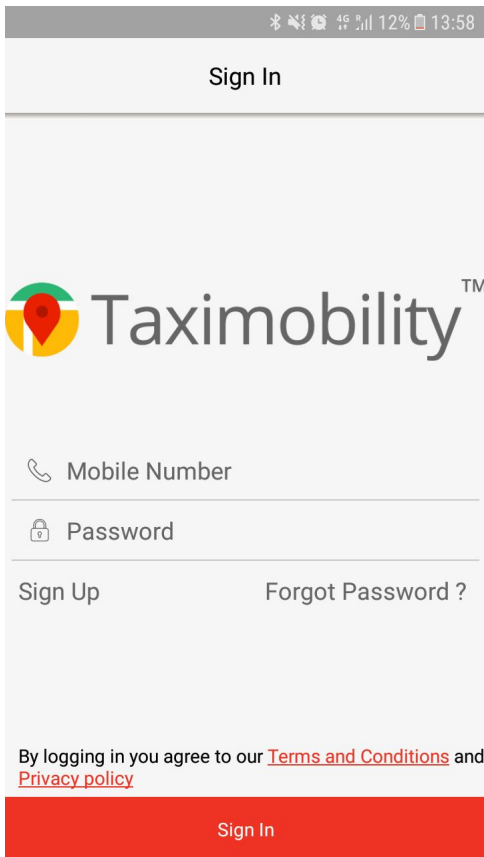

The screenshot shows the 'BECOME A DRIVER' registration page on the TaxiMobility website. At the top left is the TaxiMobility logo, and at the top right is a link to 'ABOUT US'. The main heading is 'BECOME A DRIVER' with a sub-heading 'Create Account'. The form contains the following fields: 'First Name', 'Last Name', 'Email', a phone number field with a dropdown for country code (set to 91) and a text input for the number (123-456-7890), 'Password', 'Confirm password', 'Driver License', and 'Driver licence expiry date'. Below these are two file upload sections: 'Upload driver license' and 'Upload profile image', each with a 'Choose a file' button. A note specifies that driver licenses should be uploaded as doc, docx, pdf, jpg, jpeg, or png files, and profile images as jpg, jpeg, or png files. At the bottom of the form are two checkboxes: 'Skip add fleet' and 'Terms and Conditions | privacy policy'. A prominent red 'Next' button is located below the checkboxes. At the very bottom, there are links to 'Download on the App Store' and 'Google play Google play', followed by the copyright notice '©2016 TaxiMobility. All rights reserved.'

Drivers can also register themselves by using the “Become A Driver” option in the top-right corner of the website home page. However, the registration will be activated only after the validation of documents and background checks.

3. Signing In

To start using the application, drivers are required to download the app and sign in/register using their mobile number and password. If the registered password is forgotten, the driver can click the “Forgot Password” option to receive the link to reset the password to the registered email ID and mobile number (if enabled by the admin at the back end).

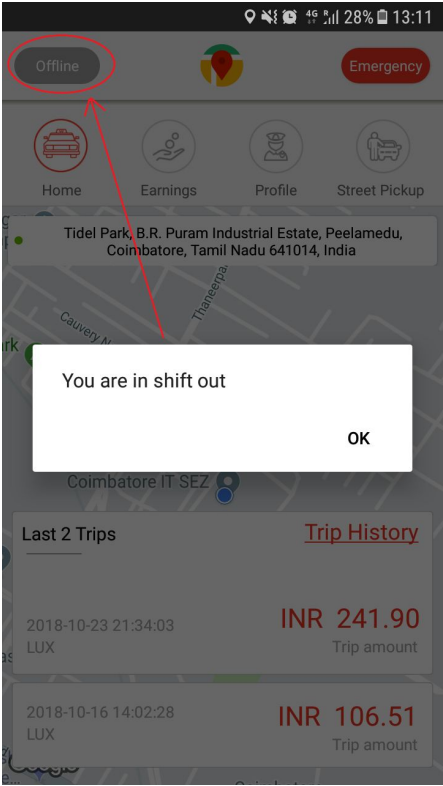

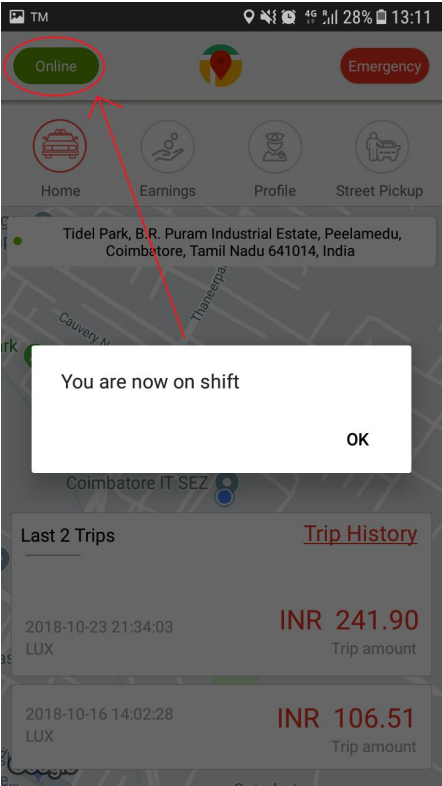

4. Home

The Home page displays a map that shows driver's current location, has a button to go online or offline, and shows details of last trip(s) taken by the driver once they started taking trips, and also has the option to view the history of all trips.

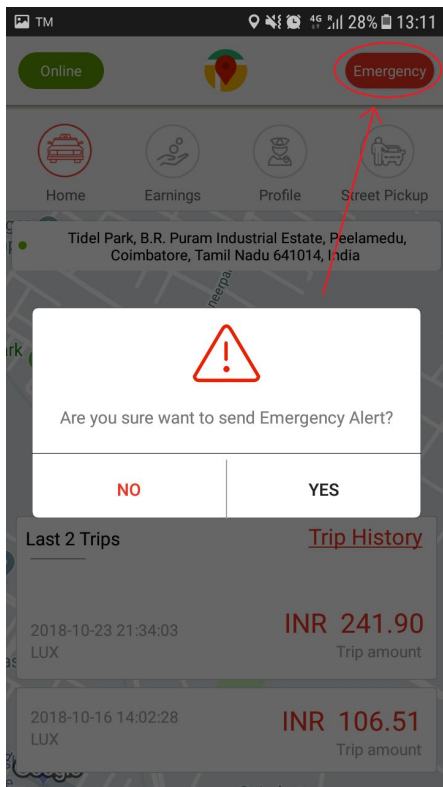

4.1 Online/Offline Mode

Drivers can enable the button in the top-left corner to go online or offline. If they keep it in "Online" mode, it will notify that they are available to take up trips. Meanwhile, in "Offline" mode, they will not receive any ride request.

TaxiMobility Driver App – V 9.0

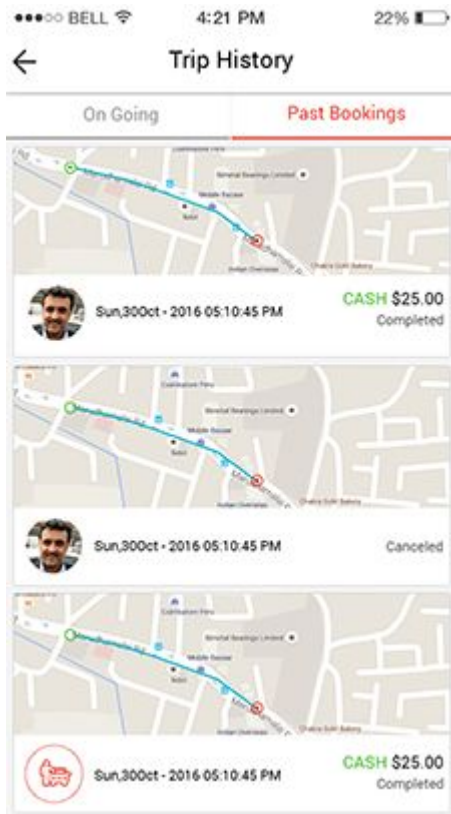

4.2 Emergency Button

Drivers can access the emergency button in the driver app at any time whether they are on trips or not. If they can click on the “Emergency” button during an emergency situation, their emergency contacts that had been saved will be notified through text message about the drivers’ situation and location.

4.3 Trip History

By clicking on the “Trip History” button, drivers can access the complete booking history of all the rides they have taken till date with the route map for any future reference. It delivers the following details.

On-going Ride

The details of the ride that is in progress are displayed here, in which drivers can view the route in the map.

Past Bookings

All rides that are completed are displayed in this section. The list contains the time, date, pickup and drop-off locations, payment type, and the status of payment for each ride.

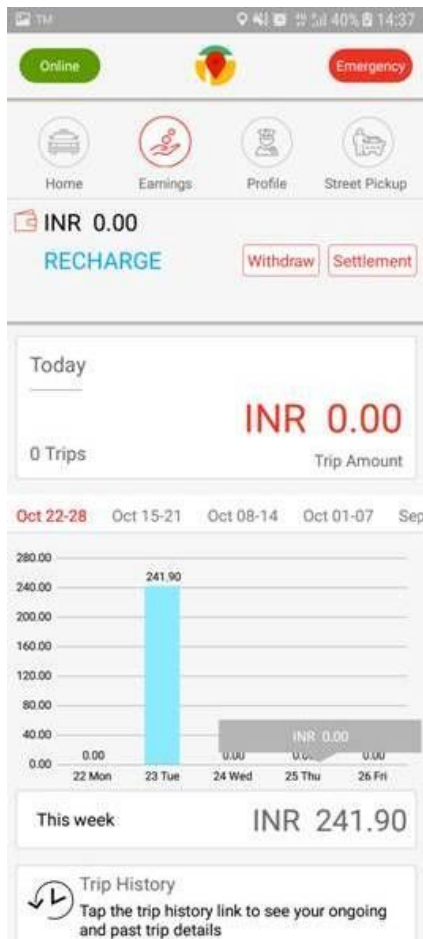

By tapping on a trip, the driver can access the trip summary in detail and swiping the “Local Trip” ribbon, they view the trip summary in detail.

TaxiMobility Driver App – V 9.0

Trip Summary	
Local Trip	Trip ID: 177
Distance	0.00 miles
Distance Fare per miles	INR 1.00
Total Distance Fare	INR 1.00
Total travel time	1 min(s)
Minutes Fare	INR 5.00
Total Minutes Fare	INR 5.00
Vehicle Waiting Time	00:30 Mins
Waiting Time Cost(per hr)	INR 60.00
Total Waiting Fare	INR 0.52
Evening Charges	INR 0.20
Sub Total	INR 6.72
Tax 12.51%	INR 0.84
Total	INR 7.56
PAID BY	
Cash	INR 7.56

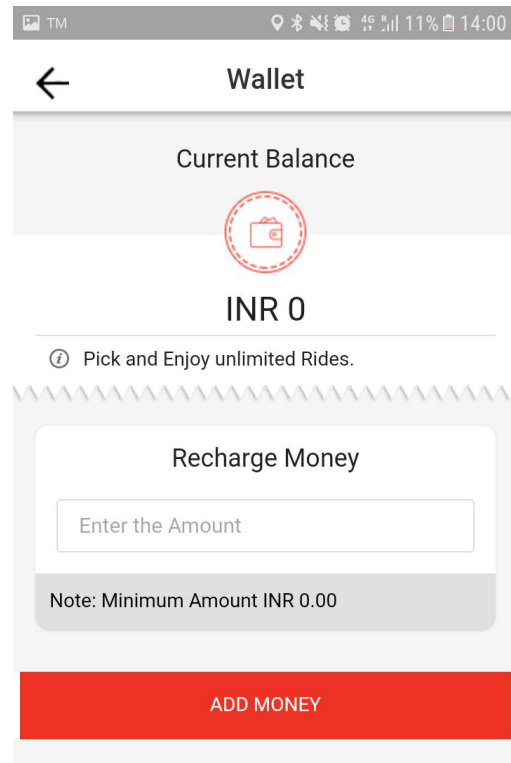

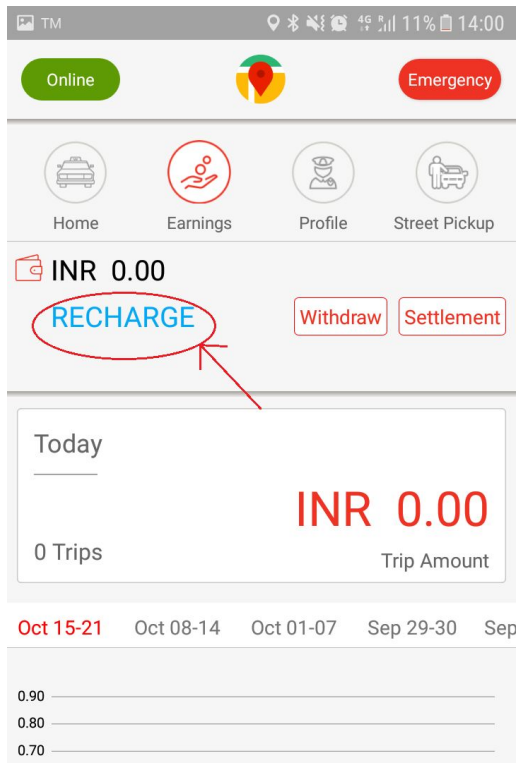

5. Earnings

“Earnings” module includes a detailed report of the daily income and the number of rides undertaken for each day with a graphical representation for drivers to manage the earnings.

5.1 Recharge

The drivers can recharge their wallet in the profile page using “Recharge” option to add money to their driver account if he/she opted a commission-based driving contract.

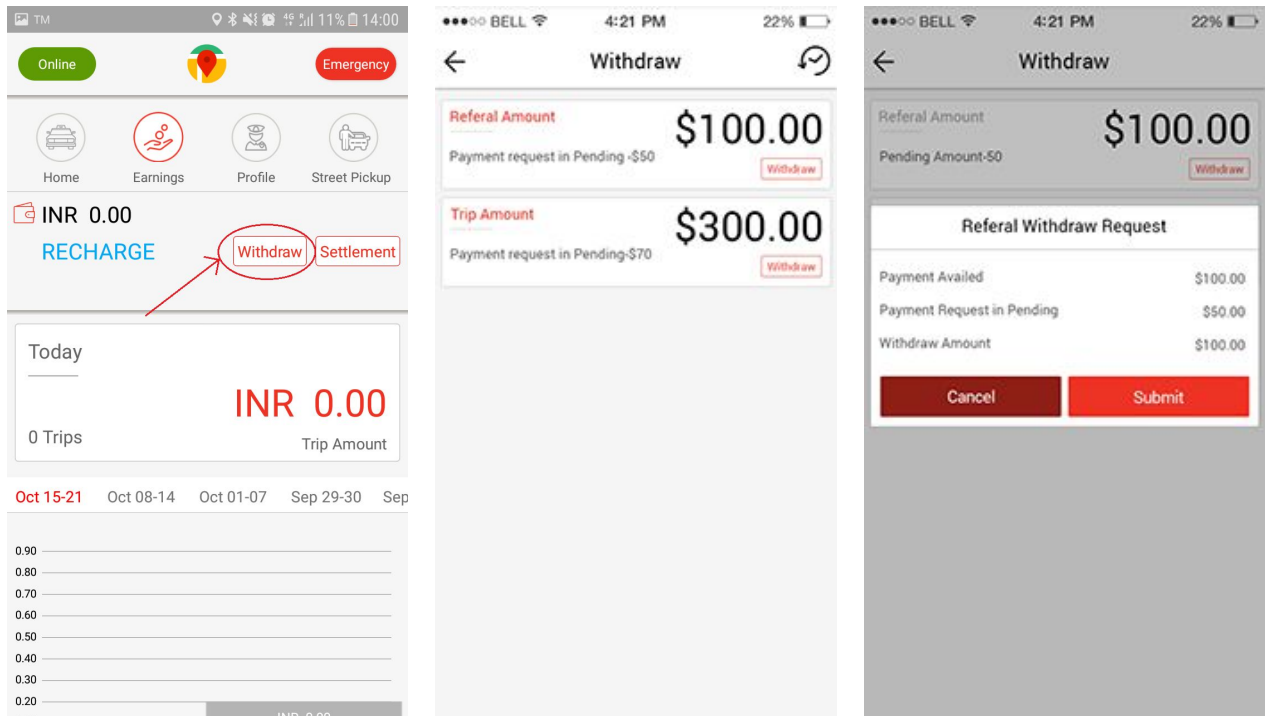

5.2 Withdrawal requests

Drivers can request to withdraw the amount in the wallet earned either by undertaking rides or through referral program anytime as required. The approval for the requests made is given by the admin or the respective taxi company. The payment mode is set by the admin in the backend. The status of each withdrawal request and the balance amount are displayed to the drivers for easy reference.

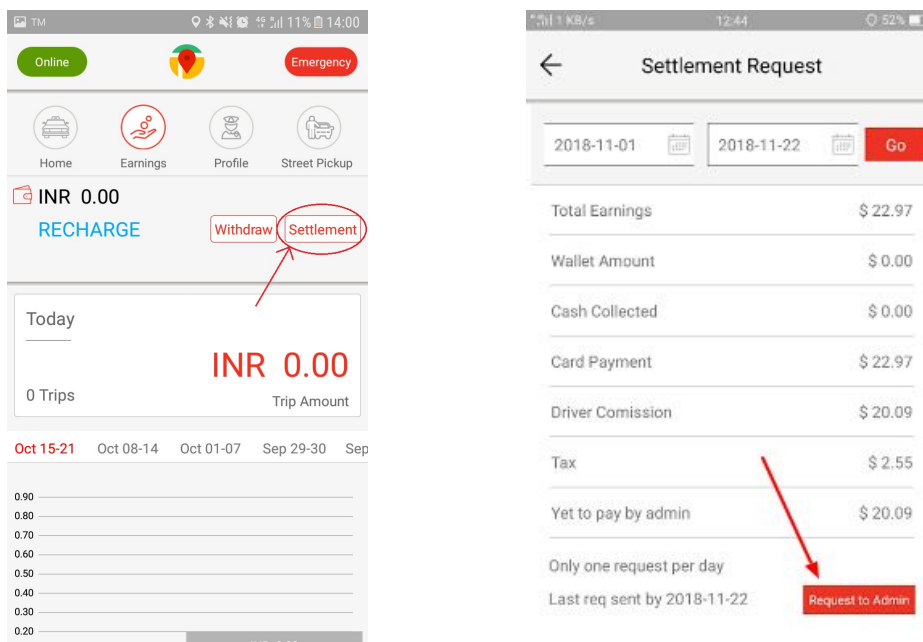

Notifications are sent to the admin/company for every driver withdrawal request. Drivers are also notified on requests being either approved or rejected by the admin/company.

TaxiMobility Driver App – V 9.0

5.3 Settlement

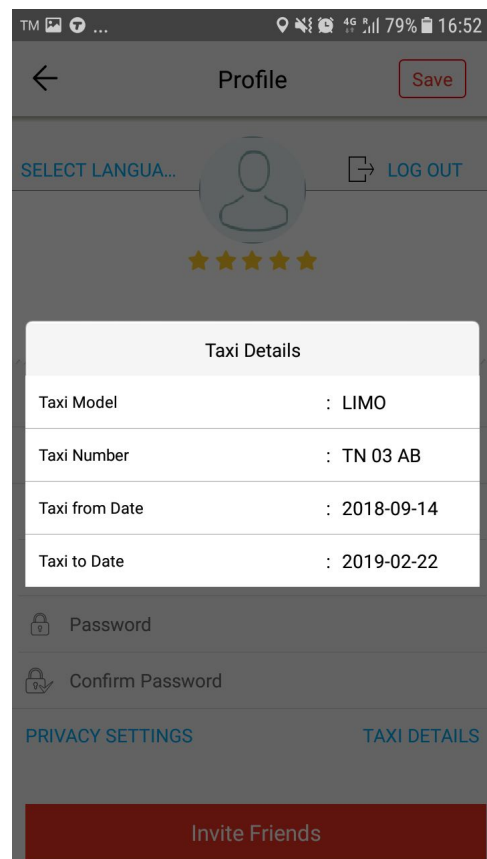

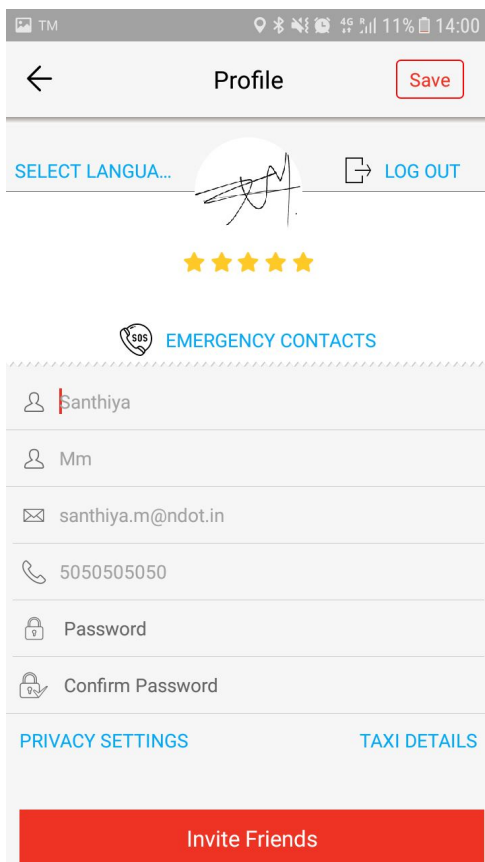

The “Settlement” option provides the details of payables/receivables to/from the drivers. By clicking on the “Settlement” button, drivers can view the history of settlement. If there is any pending settlement, the drivers can request the admin/respective company to settle the balance.

6. Profile

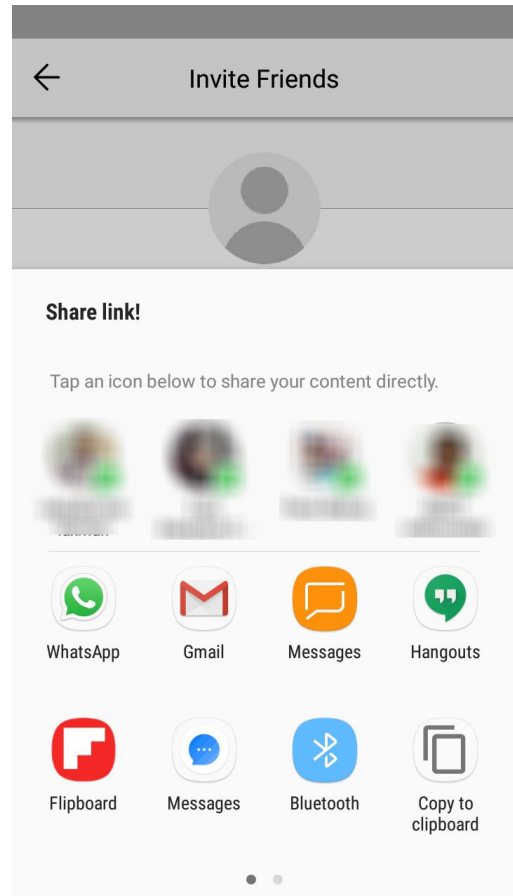

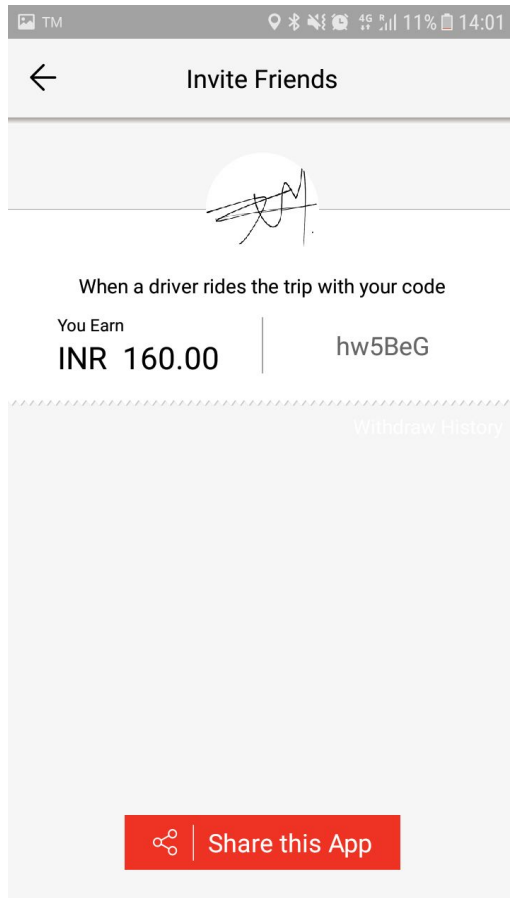

The drivers already registered with the application using the first name, last name, email address, and contact number can view and edit their profile details and password anytime as preferred. In the profile, drivers can also view the overall rating provided by passengers for their services.

At this stage, drivers can select from a list of languages to get the text displayed in the preferred language. Drivers can also invite friends to join as driver and earn a bonus for each referral. They can get their taxi details and make privacy settings from the “Profile” page.

6.1 Invite Friends

Drivers can invite their friends by sharing the app through various channels available in their smartphones. When a driver accepts the invitation to join the driver group of the particular taxi company and rides using the provided referral code, the driver who has sent the invitation receives the referral amount fixed by the taxi company in the wallet. The amount will be credited only after the successful completion of the referred driver's first trip.

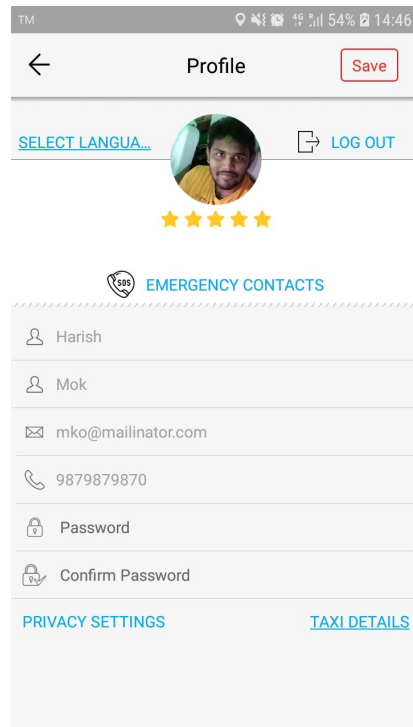

6.2 Commission and Subscription

Commission-based Drivers

The drivers can recharge their wallet in the profile page using “Recharge” option to add money to their driver account if he/she opted az commission-based driving contract.

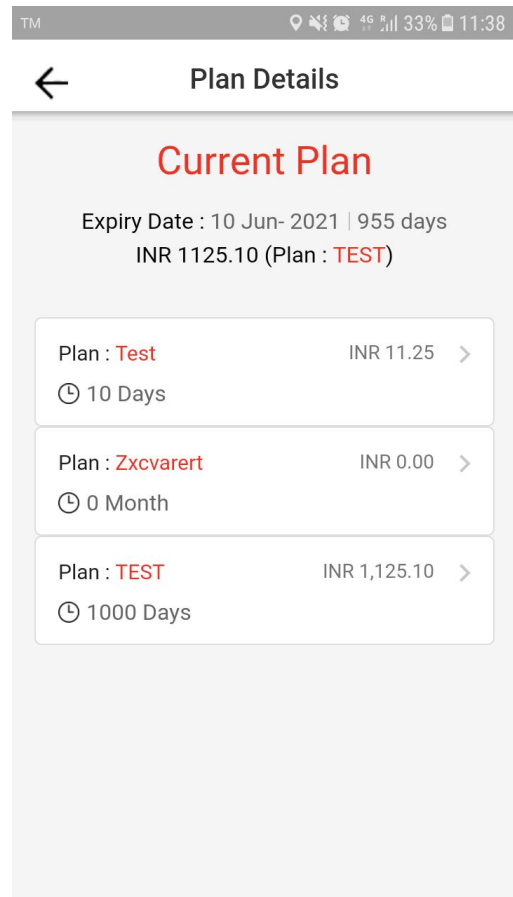

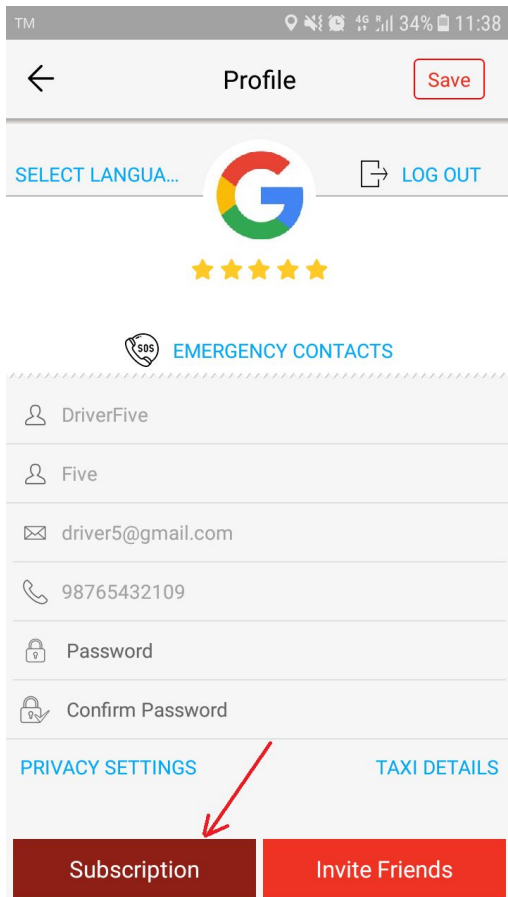

TaxiMobility Driver App – V 9.0

Subscription-based Drivers

The drivers can go for a subscription to any of the available plans for a specified duration and can take unlimited trips. He/she can change the plan at the expiration of the Current Plan.

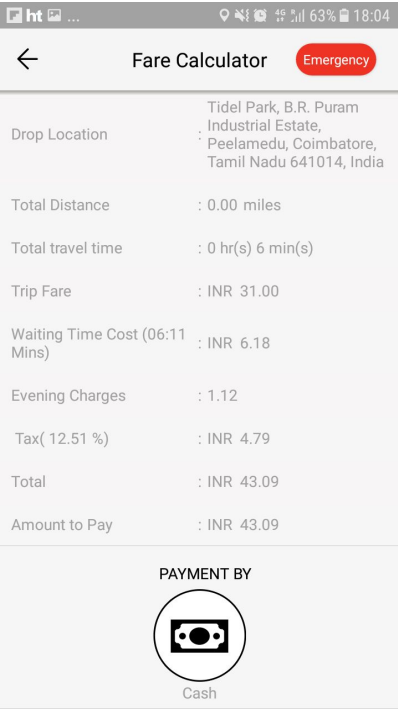

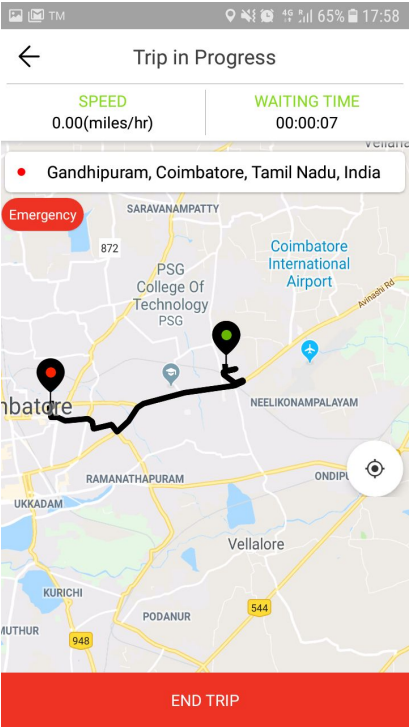

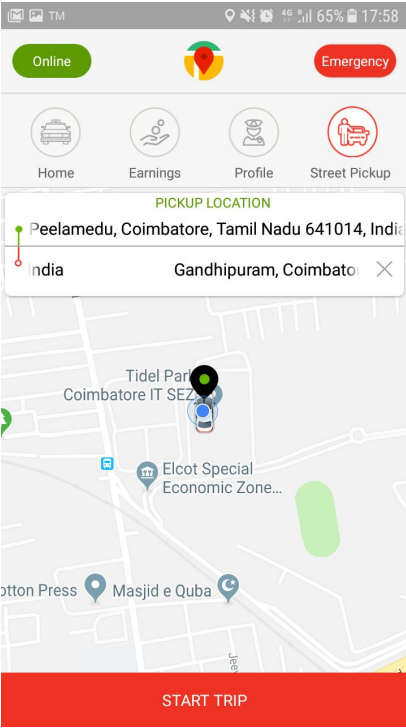

TaxiMobility Driver App – V 9.0

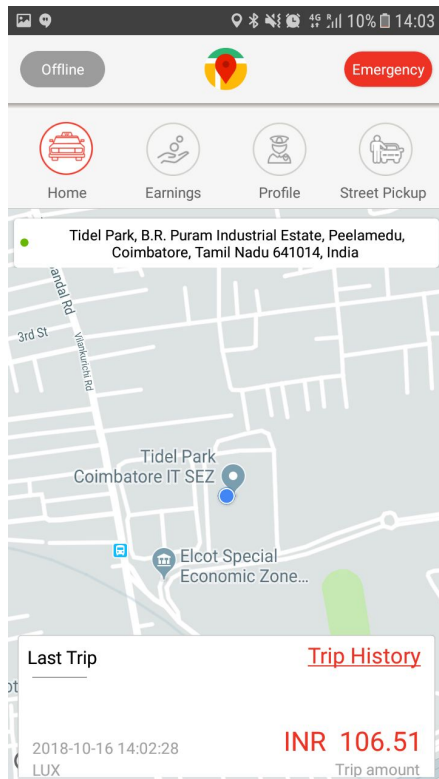

7. Street Pickup

Drivers are allowed for street pickups to pick up passengers on the route eliminating the waiting time for another passenger request. The street pickups can also be counted as working hours if the driver is on shift. Option to calculate the waiting charge is also included in the street pickup. However, they can take up "Street Pickup" option only if they are not in trip.

TaxiMobility Driver App – V 9.0

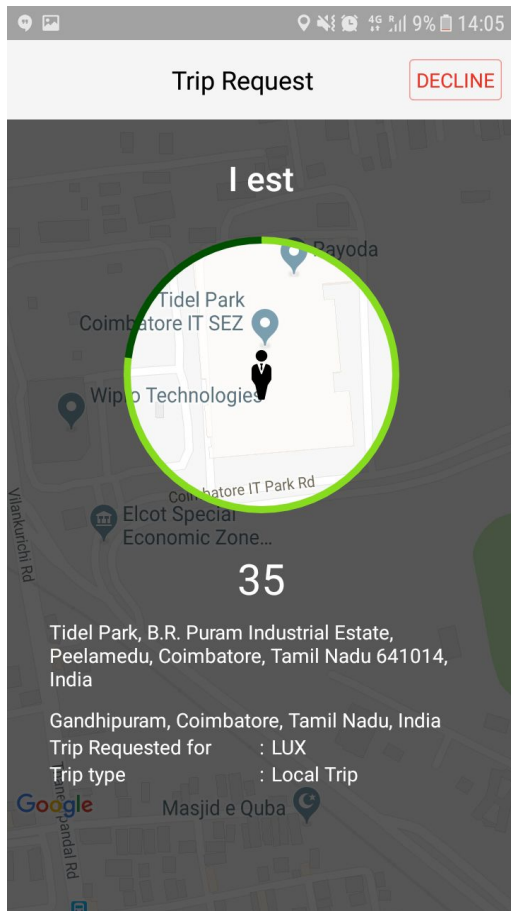

8. My Location

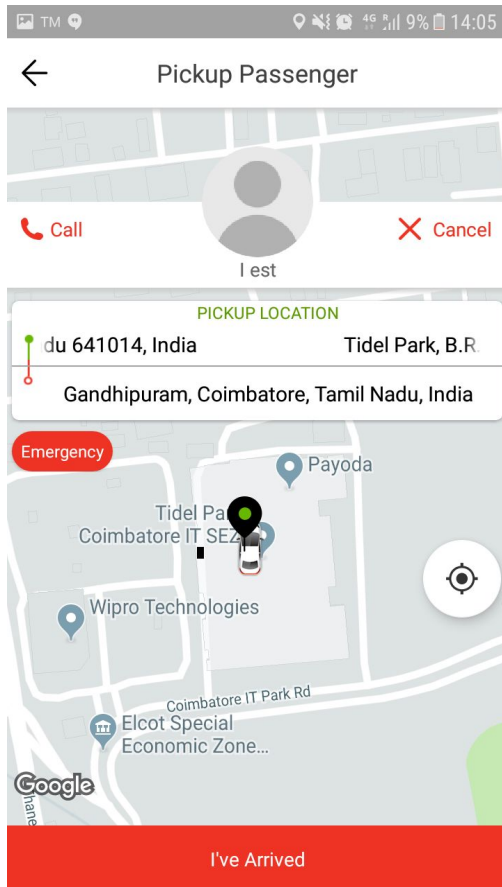

Drivers are given the provision to track their current location in the Google Map while on move. This option enables drivers to make route choices to reach the passenger's pickup point without delay and take passengers to the destination through the most convenient route possible. It also provides a glance through the details of the recently undertaken five trips and provides the link to the ride history of all rides.

9. Ride Request

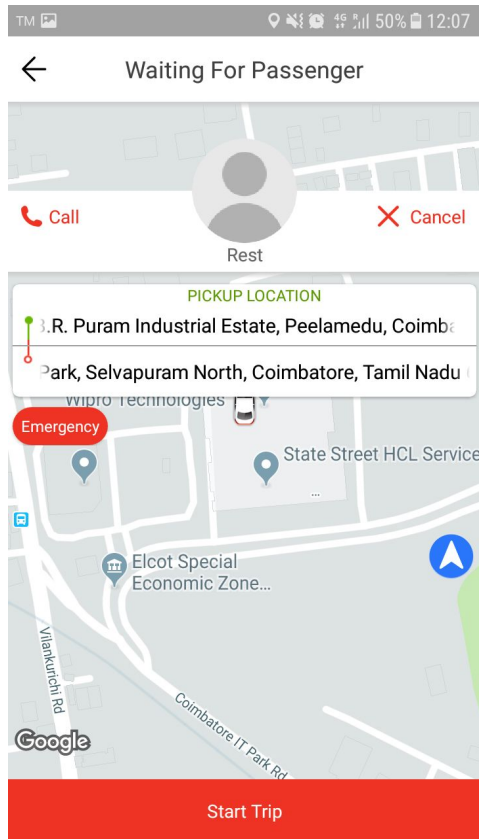

Immediately after a passenger sends a ride request (within 3 km - set as default), the driver who is at the nearest location receives a notification with the passenger's current location in the Google Map, listing down the pickup and drop off locations for easy identification. The driver is given 30 seconds (can be modified as per the discretion of the admin) to accept or deny the passenger request. If the driver rejects the request, a notification is sent to the next available driver.

9.1 Picking up Passenger

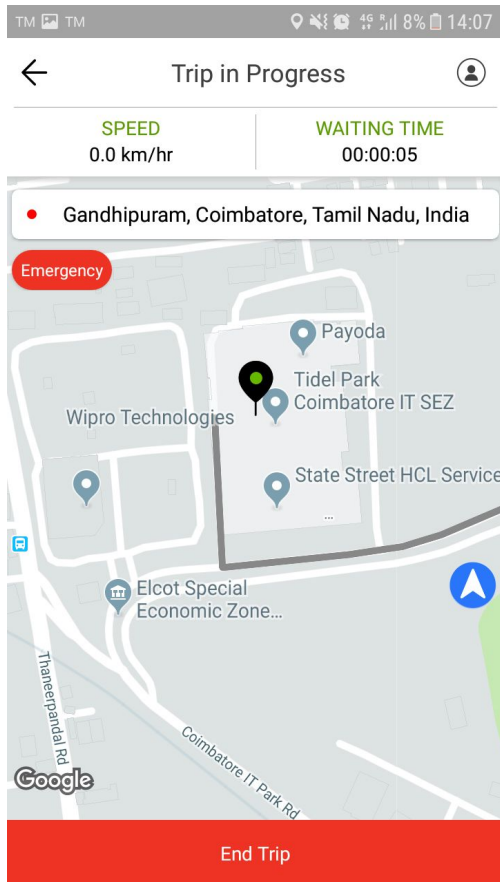

Drivers can click 'I've Arrived' once they reach the pickup location to notify passengers and avoid unwanted waiting. Drivers also have an alternative option to call the passengers over the phone when required.

9.2 Waiting for Passenger

The screen displays the passenger name and location (annotations are displayed in the map view for easy identification) with options to call the passenger over the phone while waiting or cancel the trip under reasonable circumstances. Once the passenger arrives, the driver can click Start Trip to begin the ride, from the point which the taxi fare is calculated.

9.3 Trip in Progress

The drivers can track the progress of their ride from the pickup location to the destination in the map. The waiting charges are calculated automatically during the trip as drivers are provided with the stopwatch facility to measure the waiting time. Once the vehicle reaches the destination, the driver can click End Trip.

9.4 Fare Calculator

The driver selects the payment method opted by the passengers in the driver application. Passengers can choose to pay either by cash or credit card. If they opt to pay by credit card, they can use the credit card details already saved or add a new card.

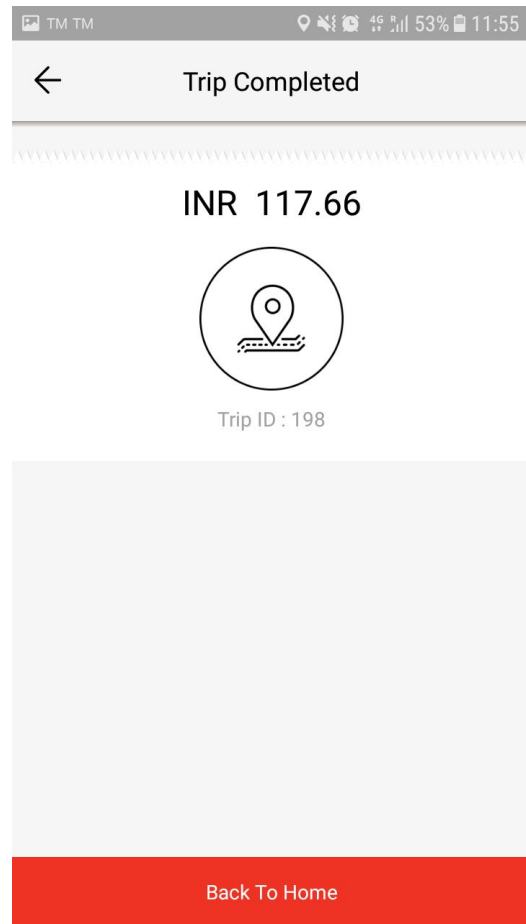

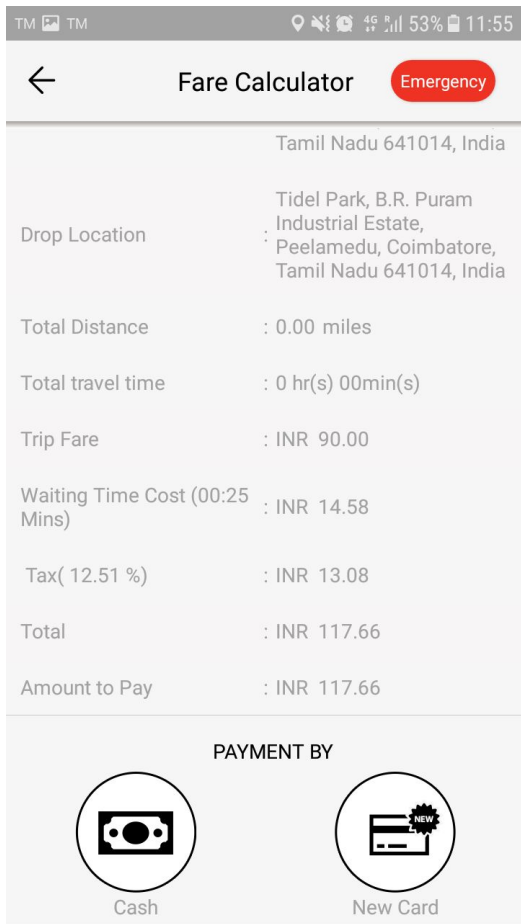

The New Card option allows passengers to add details of a new credit card, in addition to the one already saved, by providing the card type, name, number, and CVV, after which the provided details are validated by the application. The new card can be set as default instead of the one selected previously for further transactions.

The trip fare is calculated based on the location and the distance/time traveled including the waiting charges and tax, and excluding the discount amount.

If the passenger prefers to pay by cash, the driver can collect the cash after the journey and hand it over to the taxi company.

TaxiMobility Driver App – V 9.0

Once the payment is confirmed, both drivers and passengers receive notifications and a unique trip id is created for the ride completed.
